DEMO BUILD SHEET

Pain → Dashboard. By industry.

What they say in discovery, the question that surfaces it, and the exact tile it maps to on the demo.

How to read this sheet

Each industry has one table. It runs left to right: the **pain** (the manual admin they're almost certainly doing by hand), **what they say** in discovery and the **question** that surfaces it, the **dashboard element** it maps to, and the **register** — what you are allowed to claim when you point at that tile.

THREE RULES THAT GOVERN EVERY ROW

1. Only one figure is theirs — the hours. The hours row (Q6–9) is the single cell where the number on screen equals a number the prospect gave you. Every other number on the demo is illustrative until their own live data fills it after go-live. Never present a Register 2 number as their measured result — that is the fabricated baseline the Definition of Success bans.

2. Stop the funnel before the human's close. Showing/consult/app/viewing/survey booked-and-routed is the system's edge. Offer, hire, bind, treat, fund, win, acceptance — that is the client's team's work. Narrating past the routing line claims closings and breaks the standard you set at kickoff.

3. The strongest tile needs no comparison. After-hours catches, missed-call recovery and the zeros (0 to voicemail, 0 missed overnight) are true with no “before” — by hand the answer is genuinely zero. Lead the demo there whenever their pain is the overnight drop.

The register key

R1 · YOURS	The hours, said back and confirmed. The only “this is yours.” Your price anchor — route price through this and nothing else.
R2 · OTHERWISE-LOST	By-hand answer is genuinely zero (after-hours, missed-call, dormant wakes, the zeros). No comparison needed, so no baseline problem. Lead here.
R2 · STANDARD MET	Status against the target you agree at kickoff (response speed, confirmations sent). You never captured their old number, so never claim a delta.
R2 · LOAD CARRIED	Volume of work carried off their desk (fact-finds, bookings, reschedules, chasing). Weighed against what they'd do by hand.
R2 · THEIR LOGIC	System running on <i>their</i> qualification rules. Persuasive because the logic is theirs — but stop before the human's close.
FIT · NO NUMBER	No number. The correct system name or their people on screen. Makes the demo read as theirs, not a template. Personalisation, not a claim.

Recruitment

ATS, not CRM · unit: candidate / role · appointment: interview

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Sourcing candidates by hand	"on LinkedIn all day," "hunting for people," "no time to place." Q2 / Q4.	Candidates sourced KPI (the Captured tile) + Sourcing-engine node	R2 · LOAD CARRIED — volume of sourcing carried off the desk. Weigh it against what one recruiter could shortlist by hand.
Applicants reply after hours / get ghosted back	"they go quiet," "ghosting," replies landing at night. Q11 / Q10 / Q4.	Caught after hours or recovered + Last night card (0 missed) + missed-call recovery source	R2 · OTHERWISE-LOST — lead the demo here if their pain is the overnight drop. By hand these are zero; no comparison needed, so no fabricated baseline.
Slow first reply to a good candidate	"no time to reply," candidate taken by a faster agency. Q6.	Speed to first response + Standard: Met + Capture 100% answered	R2 · STANDARD MET — status against the target you agree at kickoff. You never captured their old speed, so never say "from X to 14s." The claim is "it holds."
Reading every CV by hand	"drowning in applications," "sifting," "too many applicants." Q13.	Conversion funnel: Sourced → Screened → Shortlisted & routed (STOP — placement is theirs) + Qualification node	R2 · THEIR LOGIC — funnel runs on <i>their</i> screening criteria. Narrate to "shortlisted, routed to you." The placement / hire decision is the client's close — do not narrate past it.
Database goes cold, rebuilt per role	"old candidates," "from scratch," "re-engage." Q7 / Q15.	Nurture pool (warm candidate pipeline) + re-engaged + Nurture wake feed	R2 · LOAD CARRIED + R2 · OTHERWISE-LOST — the pool is the cold ones kept; a wake is one you'd have lost, shown coming back when a matching role opens.
Interview scheduling back-and-forth	"around my diary," "scheduling." Q8 / Q14.	Interviews booked (Showings-booked tile) + reschedules + Booking node	R2 · LOAD CARRIED — bookings and reschedules handled off the desk. Volume, not a placement-rate claim.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Bullhorn / Vincere / JobAdder — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Insurance agencies

CRM: Acturis / Applied · unit: enquiry / client · appointment: advisor callback

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Enquiries hit voicemail / slow callback	"missed enquiries," "voicemail," "calling back late," "leads waiting." Q11 / Q10.	Caught after hours or recovered + Last night (0 to voicemail) + missed-call source	R2 · OTHERWISE-LOST — lead here. The after-dark window accounted for, nothing in voicemail. By hand: zero.
Same fact-find typed again and again	"same questions," "gathering details," "intake." Q2 / Q4.	Work carried (fact-finds run) + Engine fact-find node	R2 · LOAD CARRIED — volume of structured fact-finds completed before an advisor picks up.
Slow first response	advisor tied up, enquiry sits. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered in seconds, every channel, watch it hold. Status vs agreed target.
Re-keying into multiple carrier portals	"re-keying," "retyping," "copy-paste," "five times." Q2 / Q4.	Engine market-submission node + live feed "prepped for [carrier]"	R2 · LOAD CARRIED — the retyping carried. Engine-node + feed, not a headline tile.
Renewals / MTAs slip when busy	"renewals," "MTAs," "slipping," "forgot to chase." Q15 / Q7.	Nurture pool (renewal diary) + re-engaged + Reminders node	R2 · LOAD CARRIED — diarised renewals worked on time. Frame as nothing slipping, not a retention-rate claim.
Advisor appointments / reschedules	scheduling callbacks, moving them. Q8 / Q14.	Appointments booked (Showings tile) + reschedules + Booking node	R2 · LOAD CARRIED — calendar work off the advisors' desks.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Acturis / Applied Epic — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Aesthetics clinics

PMS: Pabau / Aesthetics PM · unit: enquiry / patient · appointment: consultation

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
DMs after hours, patient books elsewhere	"Instagram," "WhatsApp," "after hours," "book elsewhere," "missed messages." Q10 / Q11 / Q4.	Caught after hours or recovered + Last night (0 to voicemail) + channel sources (IG/WA)	R2 · OTHERWISE-LOST — lead here. The 11pm enquiry who messaged five clinics gets a real answer from theirs. By hand at 11pm: zero.
Same price / suitability questions all day	"same questions," "price questions," "time-wasters." Q13.	Conversion funnel: Enquiry → Qualified → Consult booked (STOP — the treatment sale is theirs) + Triage node	R2 · THEIR LOGIC — triage on their suitability/finance rules. Stop at consult booked; the clinician converts.
Slow first reply	reception not on IG at night. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — every channel answered in seconds, around the clock.
Chasing consent forms & photos	"consent forms," "photos," "chasing paperwork," "missing forms." Q2 / Q4.	Engine records-collection node + live feed "consent + photos filed to PMS"	R2 · LOAD CARRIED — paperwork collected before the visit, filed to their PMS. Engine-node, not a tile.
Recall / lapsed patients never asked back	"never come back," "lapsed," "top-ups," "recall." Q15 / Q7.	Nurture pool (recall by treatment) + re-engaged + Nurture wake feed	R2 · LOAD CARRIED + R2 · OTHERWISE-LOST — the "assumed went elsewhere" patients, asked by treatment type. A wake is one back in the diary you'd have lost.
No-shows / empty slots	"no-shows," "cancellations," "empty slots." Q16.	Reminders node (sent / no-show vs industry) + Booking reschedules	R2 · STANDARD MET — every confirmation sent, gap refilled on cancel. Tie to the step, not to their no-show rate (you never measured it).
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Pabau / Aesthetic PM — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Dental practices

PMS: Dentally / SOE / R4 · unit: patient / call · appointment: appointment

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Front desk chairside, calls hit voicemail	"missed calls," "front desk busy," "chairside," "lunchtime calls." Q11 / Q10.	Caught after hours or recovered + missed-call recovery source + Last night card	R2 · OTHERWISE-LOST — lead here. The lunchtime caller hits a booking, not voicemail. Desk can't answer a patient and a caller at once — this is the overflow, otherwise lost.
Routine questions tie up the desk	"routine questions," "front desk tied up." Q13.	Conversion funnel: Enquiry → Triaged → Appt booked + Triage node (clinical cases escalated)	R2 · THEIR LOGIC — routine handled, clinical escalated on their rules. Stop at booked.
Slow / no first reply	no one free to pick up. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered the moment it lands, every channel.
Chasing medical histories & forms	"medical histories," "forms," "chasing paperwork." Q2 / Q4.	Engine records-collection node + feed "history filed to PMS"	R2 · LOAD CARRIED — histories collected before the visit so the clinician walks in informed.
Recall list never worked	"recall," "six-month," "never worked," "lapsed patients." Q15 / Q7.	Nurture pool (recall cycles) + re-engaged + Nurture wake feed	R2 · LOAD CARRIED + R2 · OTHERWISE-LOST — the non-responders worked, not just the list existing.
No-shows / empty diary	"no-shows," "empty diary," "reminders." Q16.	Reminders node + Booking reschedules (slot refilled on cancel)	R2 · STANDARD MET — confirmation cadence sent; gap refilled. Step, not their rate.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Dentally / SOE / R4 — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Real estate brokerages

Follow Up Boss / kvCORE / Sierra · unit: lead · appointment: showing

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Portal leads called back late / overnight	"Zillow," "speed to lead," "calling back late," "overnight," "leads go cold." Q11 / Q10 / Q4.	Caught after hours or recovered + Last night (0 to voicemail) + missed-call source	R2 · OTHERWISE-LOST — lead here. The 9pm Zillow lead who filled three forms gets the first call from them. This is the reference dashboard — the tile is literally built.
Tyre-kickers eat agent time	"tyre-kickers," "not pre-approved," "serious buyers." Q13.	Conversion funnel: Captured → Qualified → Showing booked & routed (STOP — offer / closing is theirs)	R2 · THEIR LOGIC — funnel routes hot to a closer on their criteria. Do not narrate to "offer made / 18." Closings are the line the Definition of Success forbids.
Slow speed-to-lead	"we'll get back to you Monday." Q6.	Speed to first response (14s) + Standard: Met	R2 · STANDARD MET — under 60s, every channel, watch it hold.
"Maybe next spring" long-tail dropped	"old leads," "drop off," "maybe next spring," "my database." Q15 / Q7.	Nurture pool (412) + re-engaged + Nurture wake (Patel, 4-mo dormant)	R2 · LOAD CARRIED + R2 · OTHERWISE-LOST — long-tail kept warm; a dormant wake is a lead you'd have lost.
Showings booked around their diary	"booking showings," "around my diary." Q8 / Q14.	Showings booked (89) + reschedules (34) + Booking node	R2 · LOAD CARRIED — calendar fills while they're at a closing. Volume off the desk.
No-shows	"no-shows," "confirmations," "reschedules." Q16.	Reminders node (156 sent · 8% vs industry 18%)	R2 · STANDARD MET — every confirmation sent. The 18% is an industry figure, not their measured before.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Follow Up Boss / kvCORE / Sierra — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Property (UK estate / letting)

Reapit / Alto / Jupix · unit: enquiry / applicant · appointment: viewing

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Portal enquiries cool before callback	"Rightmove," "Zoopla," "calling back late," "leads cold." Q11 / Q10.	Caught after hours or recovered + missed-call source + Last night card	R2 · OTHERWISE-LOST — lead here. The branch that calls back first wins it; a lead in an inbox isn't worked.
Time-wasters vs serious applicants	"time-wasters," "qualifying," "not serious." Q13.	Conversion funnel: Enquiry → Scored → Viewing booked + Scoring node	R2 · THEIR LOGIC — scored pass / fail / review on their rules. Stop at viewing booked; the offer is theirs.
Slow first reply	everyone out on viewings. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered while the team is out of the office.
Viewings booked around the diary	"booking viewings," "the diary," "scheduling." Q8 / Q14.	Viewings booked (Showings tile) + reschedules + Booking node	R2 · LOAD CARRIED — diary coordinates itself; volume off the desk.
Chasing referencing / maintenance / landlords	"referencing," "maintenance," "landlord updates," "chasing." Q7 / Q15.	Engine behaviour-triggered node + live feed "referencing chase fired"	R2 · LOAD CARRIED — the chasing runs itself, triggered by case stage. Engine-node, not a tile.
Enquiries scattered across channels	"multiple channels," "no single view," "scattered." Q10.	Lead sources panel + Channels live health strip (one answered queue)	R2 · LOAD CARRIED — every channel in one answered view. Count of channels live, nothing missed.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node, labelled Reapit / Alto / Jupix — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Mortgage & lending

LOS: Encompass / Calyx / LendingPad · unit: borrower · appointment: LO call

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Rate-shoppers / after-hours enquiries lost	"missed enquiries," "rate shoppers," "after hours," "leads waiting." Q11 / Q10.	Caught after hours or recovered + Last night (0 to voicemail) + missed-call source	R2 · OTHERWISE-LOST — lead here. The 9pm rate-shopper hits a qualified conversation, not voicemail.
Pre-qualifying borrowers who aren't ready	"pre-qual," "not ready," "wasting time." Q13.	Conversion funnel: Enquiry → Pre-qualified → App started & routed (STOP — the funded loan is theirs)	R2 · THEIR LOGIC — hot pre-quals routed to the top LO, marginal to credit nurture, on their rules. Stop at app started; funding is the client's.
Slow first response	borrower sits, calls the next lender. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered the moment it lands.
Chasing stale docs / self-employed drag	"chasing docs," "stale," "self-employed," "back-and-forth." Q2 / Q4.	Engine doc-collection node + feed "1003 + paystubs filed to LOS"	R2 · LOAD CARRIED — docs collected at the right point, flagged before stale. Engine-node, not a tile.
"Where's the appraisal?" eats the morning	"status questions," "where are we," "eating my morning." Q2 / Q5.	Engine status-update node + live feed "status sent to borrower + agents"	R2 · LOAD CARRIED — the morning hour handled. Frame as load lifted, routed via the hours anchor.
Loans die at week five (conditions / rate-lock)	"conditions," "rate lock," "re-docs," "week five," "weekends." Q4 / Q5.	Engine conditions node + feed "condition cleared same-day" + 0 stalls	R2 · STANDARD MET + R2 · OTHERWISE-LOST — the Friday→Monday gap closed; conditions cleared same business day. The loan that would've died is otherwise-lost. Do not claim a close-rate lift.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Encompass / Calyx / LendingPad — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Trades & home services

Job mgmt: ServiceM8 / Jobber / Commusoft · unit: enquiry / job · appointment: survey

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
On the tools, calls missed	"missed calls," "on site," "on the tools," "lost jobs." Q11 / Q10.	Caught after hours or recovered + missed-call recovery source + Last night card	R2 · OTHERWISE-LOST — lead here. The boiler emergency calling three plumbers reaches them first. A missed call is a booked job for the next number they ring.
Emergencies mixed with time-wasters	"time-wasters," "emergencies," "mixed enquiries," "triage." Q13.	Conversion funnel: Enquiry → Triage → Survey booked + Triage node (emergencies dispatched)	R2 · THEIR LOGIC — triaged by job size / claim-vs-private on their rules; emergencies routed to dispatch. Stop at survey booked.
Slow first reply	hands full on a job. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered even while on site.
Quotes sent and forgotten	"quotes," "not following up," "gone quiet," "lost quotes." Q7 / Q15.	Nurture pool (quote follow-up) + re-engaged + Nurture wake feed	R2 · LOAD CARRIED — quotes chased like a pipeline. Map the chasing, not a conversion-rate claim ("doubles or triples" is a closings-style claim — keep it off the dashboard).
Surveys booked around the diary	"booking surveys," "scheduling visits." Q8 / Q14.	Surveys booked (Showings tile) + reschedules + Booking node	R2 · LOAD CARRIED — office stops being the bottleneck. Volume off the desk.
Invoicing / payment chase by memory	"invoicing," "chasing payment," "owed money," "repeat work." Q2 / Q5.	Engine invoicing node + feed "invoice + reminder sent" + 3/6/12-mo follow-up	R2 · LOAD CARRIED — invoices and reminders fired, repeat-work touchpoints carried. Engine-node, not a tile.
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled ServiceM8 / Jobber / Commusoft — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.

Family & consumer legal

Clio / practice mgmt · unit: intake / matter · appointment: consultation

PAIN POINT	WHAT THEY SAY · & THE QUESTION	DASHBOARD ELEMENT IT MAPS TO	REGISTER · WHAT YOU CAN HONESTLY SAY
Intake calls missed, client rings next firm	"missed intake," "after hours," "voicemail," "calling other firms." Q11 / Q10.	Caught after hours or recovered + Last night (0 to voicemail) + missed-call source	R2 · OTHERWISE-LOST — lead here. The 6pm custody caller reaches the firm first, before two other lawyers.
Matter details captured for conflict check	matter type, parties, jurisdiction. Q13 / Q2.	Conversion funnel: Intake → Conflict-prepped → Consult booked (STOP — acceptance stays with the attorney)	R2 · THEIR LOGIC — intake structured for the attorney's decision. Hard stop: acceptance of representation is always the attorney's, never the system's.
Slow first response to a new matter	enquiry sits. Q6.	Speed to first response + Standard: Met	R2 · STANDARD MET — answered the moment it lands, every channel.
Chasing client + third-party documents	"chasing documents," "records," "third parties," "outstanding." Q2 / Q4.	Engine records-tracking node (two pipelines) + feed "what's outstanding"	R2 · LOAD CARRIED — client-side and third-party docs tracked in one view. Engine-node, not a tile.
Court dates / deadlines across calendars	"court dates," "deadlines," "scheduling," "missed dates." Q14 / Q16.	Engine deadline node + Reminders (fire to attorney / paralegal / client)	R2 · STANDARD MET — reminders fire so nothing rests on memory. One missed date is malpractice; frame as the standard holding.
Billable time reconstructed at month-end	"time capture," "month-end," "under-billing." Q2 / Q5.	Engine time-capture node + live feed "time entry prompted"	R2 · LOAD CARRIED — time captured as work happens. The "15–25% more" is an industry figure — present as "captured in real time," never as "we raised your billing by X."
Re-typing into the system of record	"the CRM / the system," "data entry," "out of date," "half-filled." Q12b.	Engine CRM-sync node , labelled Clio / practice mgmt — not "CRM"	FIT · NO NUMBER — no number. One correct system name is what makes the screen read as theirs, not a template. Ten seconds; you are naming it, not integrating it.
All of the above, in hours off their week	The summed hours estimate — new enquiries + chasing + booking — said back and confirmed. Q6–9. The one answer that must leave the call as a number.	Your time, run for you (value band) + Engine time saved	R1 · YOURS — the only cell where the screen number equals a number they gave you. Say "this is yours." Everything else fills from live data post go-live. This row is your price anchor — route price through it, nothing else.
Who handles what (their org)	The order they name people in, and the split. Q17 / Q18.	Team activity + "routed to [their name]" in the live feed	FIT · NO NUMBER — no number. Their people, their split, on screen. Proves you listened. Personalisation, not a claim.
